

F6 — TFIM coupling gradient: shot floor (L) + control-error amplification (R); Hamiltonian-level under T4 ($\delta=0.02$ best-guess)

(L) floor: PSR/NSR $\rightarrow \nabla C_{\text{noisy}}$, FD floors ($T/T_2^*=0.15$)

(R) amplification: FD V-shape vs PSR/NSR flat ($N=10000$)
