

$$H(\theta) = \theta Z_0 + X_0 \quad \cdot \quad \text{Hamiltonian-level} \quad \cdot \quad T/T_2^* = 0.5$$

- device landscape $C_{\text{device}}(\theta)$
- FD secants (wrong sign)
- FD at small ϵ : setpoint-error scatter ($\pm 1\sigma$)
- shift-rule tangent (PSR/NSR) $= \nabla C_{\text{device}}$
